

# SUCCESS STORY

---

## EFon Technology , Taiwan

**EFon Technology,  
Taiwan**

**MQTT Broker  
Implementation**

## Challenges

- ◆ Searching for a Robust and extendable MQTT Broker and a right technology team to partner with for our Software implementation.
- ◆ Customizable User Interface and integrating it with our Social Platform based on the combination of the Device and owner.

## Solution

- ◆ Able to push the data based on the sensors to the Dashboard and create rules to show alerts based on received values
- ◆ The custom store option of the MQTT Broker was leveraged and integrated with the Social Platform with a two way handshake model.
- ◆ Were able to host it as a service on the Alibaba cloud to run it parallel to our Platform.
- ◆ Successfully working with our Gateway for all the messages received from our sensors.

## Benefits

- ◆ Very affordable and robust MQTT Broker which saved us a lot of Money
- ◆ A Great Team to work with for longer term for any product enhancement or customization
- ◆ Faster development cycle that highly reduced our Go to Market time.

---

**“The team at Bevywise Networks are MQTT / IoT experts. Their expertise helped us converge on our MQTT requirement much easier and faster. We would be happy to recommend Bevywise for any IoT Implementation.”**
